SHIP MODEL APPRAISAL QUESTIONNAIRE ©1984

If logistics or geographical location does not permit a firsthand appraisal, we can, through the use of this "Questionnaire" and several color photographs (full view and close-up details), derive an approximate value range for a given ship model. It should be understood that our appraisal will be based upon the comprehensiveness and accuracy of the information provided, and/or will be interpreted to the best of our ability.

PLEASE SUPPLY A MINIMUM OF THREE (3) NON-RETURNABLE COLOR PHOTOS SHOWING CLEARLY:

Full view, close-up details, and both sides of model.

Feel free to comment on any other information or details concerning the model's uniqueness, construction elements, origin or display which you think may help in our evaluation. If you have any letters, documents or information on the model, including former appraisals, copies of these should also be included (use another sheet if necessary).

Even though a ship model appraisal and/or evaluation is a subjective opinion it can be an educated one!

The policy of The **AMERICAN MARINE MODEL GALLERY**, Inc. is to try and derive a value which reflects both current replacement cost and current market value.

Because the gallery is continually involved with the construction of ship models, as well as the trends in their marketability, we can provide an appraisal based on knowledge, not presumption.

The following is a list of factors which are considered in our ship model Appraisal/Evaluation.

1. General quality of craftsmanship
2. Provenance
3. Rarity (i.e.: P.O.W. & DOCKYARD vs C.W. MORGAN)
4. Historically accurate (regards to plans/research)
5. Builder (reputation)
6. Methods & materials used in construction
7. Uniformity of scale and proportion
8. Size (2" vs 10")
9. Present condition
10. Era & vessel type
11. Sails
12. Finish (painted or natural)
13. Overall display and presentation
